

Hands-on Intro to R

Wim R.M. Cardoen
Center for High-Performance Computing (CHPC)
University of Utah

April 2, 2026

Overview

This document contains general information for the “Hands-on Introduction to R” lectures.

I Access to the R language interpreter and the RStudio IDE

The lectures require access to an R language interpreter and the RStudio IDE. Below, you will find a few options:

1. If you have a valid CHPC account, you can use CHPC’s [Ondemand Web Portal](#). After logging into OnDemand, you can launch the RStudio Server application, which includes R and RStudio.
2. You can sign up for an account on [Posit Cloud](#), which provides 25 hours/month of free computing time. Posit Cloud contains R and RStudio.
3. You can also install R and RStudio on your machine. The R command-line interpreter can be downloaded from the [Comprehensive R Archive Network \(CRAN\)](#). The RStudio Desktop IDE can be downloaded from the [Posit downloads page](#).

II Obtaining the lecture material

All course material can be obtained from: <https://github.com/chpc-uofu/intro-r>.

If you have Git installed, you can obtain the material as follows:

```
git clone https://github.com/chpc-uofu/intro-r.git
```

Another option is to download the ZIP file at:

<https://github.com/chpc-uofu/intro-r/archive/refs/heads/main.zip>
